Soundgard is a fast, cost-effective solution to the problem of noise nuisance in a variety of infrastructure situations. Highways, railways, airports and many other situations where there is the requirement to reduce noise transmission will benefit from Soundgard's high performance characteristics.

Soundgard uses high strength frames and support systems together with sound insulating panels to create a sound barrier that is quick and easy to install in every application, using established construction techniques.

Effective sound absorption is complemented by the wide range of panel styles and finishes available, ensuring that Soundgard will blend into virtually every environment.

The materials used to manufacture Soundgard components combine with high quality finishes to deliver exceptional durability and assure long-life aesthetics.
