

Supadek from

ISCHEBECK
TITAN

- Access platform solutions for the future

Supadek is an innovative platform decking system that will revolutionise the scaffolding and access markets. Lightweight, durable and strong, Supadek is easier to use, leaner and safer than traditional timber and steel boards, offering many unique features and benefits that make it suitable for a wide variety of standard and specialist applications throughout the construction and allied industries:-

Easier handling

- At least 20% lighter than equivalent timber scaffold boards.
- Consistent weight - no water content.
- No splinters or metal bands to cause hand injuries.
- Faster erection and dismantling.
- Dust free - eliminates the need for plastic sleeves in clean room environments.

Safety

- Integral textured, non-slip surface.
- No slip on tube transoms.
- No warping. No knots. No rust.
- Consistent mechanical properties.

Strength

- Complies with current and planned European platform loading standards.

Durability

- Greater resistance to damage by salt water, oil, solvents and acids.
- Rust, rot and fungus proof.
- Secure end caps.

Long life

- At least treble the expected life of timber scaffold boards.

Versatile

- Standard scaffold board profiles in lengths to suit customers' needs.
- Can be used with standard timber and steel scaffold boards.
- Can be cut and notched, and will accept nails and screws.

Low maintenance

- Easier to clean than timber boards.

Environmental

- Manufactured from recycled plastics with glass fibre reinforcement.
- Reduces demand on timber.
- Recyclable.

Security

- Can be produced in house colours.
- Customer codes can be embossed on product.

Standard profiles

- 45mm x 225mm. Clear spans of at least 1.5m. Weight @ 3.9m - 14.5kg.
- 65mm x 225mm. Clear spans of at least 2.4m. Weight @ 2.4m - 11.5kg.

Conformance testing

- Testing by the University of Wales, Swansea and the Building Research establishment, Hertfordshire.
